Gross State Product

We use a large amount of data in our [site selection consulting](#) and [economic development](#) work. National data sets from federal sources are our favorite and we decided to post some data sets we use. We will start with information from the Bureau of Economic Analysis. The revised BEA website is a wonderful resource, but many statistics and lists are only accessible behind a javascript menu.

The below worksheet is Gross State Product. In billions of Current US Dollars, from the Bureau of Economic Analysis.
